Importing a Soundbox Instrument

Download and install the Soundbox Engine from the audiomodern website:
<http://audiomodern.com/soundbox>

Soundbox Instruments can be imported into Soundbox by simply dragging & dropping them (.sbpack) into Soundbox.

Alternatively, click the **User Sounds** menu to enter the presets & packs manager.

Click **Import Pack**.

Locate and select the Sounbox Instrument (.sbpack) that you want to import and click Open/Import:

Done!

Now you are able to see the Imported Instrument under the Packs category.

All presets included in the Instrument can be found in the right column. Double-click a preset to load it.
